Caller ID compatible

Please read before use and save Charge the batteries for approx. 15 hours before initial use

General Safety

Only use the power supply included with the product.

Do not connect the AC Adaptor to any AC outlet other than the standard AC220-240V.

The apparatus is approved for use with PQLV19E power supply.

This apparatus is unable to make emergency telephone calls under the following conditions:

- The portable handset batteries need recharging, or have failed.
- During a mains power failure.
- When the Key Lock is set to ON.
- When the unit is in Direct Call mode.
- Do not open the base unit or handset (other than to change the batteries).
- This apparatus should not be used near emergency/intensive care medical equipment and should not be used by people with pacemakers.
- Care should be taken that objects do not fall onto, and liquids are not spilled into the unit. Do not subject this unit to excessive smoke, dust, mechanical vibration or shock.

Environment

- $\, \odot \,$ Do not use this unit near water.
- This unit should be kept away from heat sources such as radiators, cookers, etc. It should also not be placed in rooms where the temperature is less than 5°C or greater than 40°C.

The AC Adaptor is used as the main disconnect device, ensure that the AC outlet is located / installed near the unit and is accessible.

WARNING:

TO PREVENT THE RISK OF ELECTRICAL SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY OTHER TYPE OF MOISTURE.

0

0

Use only specified batteries.

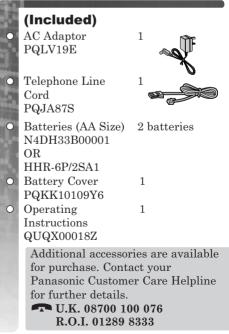

Only use rechargeable batteries.

Do not mix old and new batteries.

Do not dispose of batteries in a fire, they may explode. Check local waste management codes for special disposal instructions.

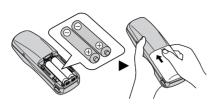

- Do not open or mutilate the batteries. Released electrolyte is corrosive and may cause burns or injury to the eyes or skin. The electrolyte may be toxic if swallowed.
- Exercise care in handling the batteries in order not to short the batteries with conductive materials such as rings, bracelets and keys. The batteries and/or conductor may overheat and cause burns.
- Charge the batteries provided in accordance with the information given in this operating guide.

Accessories

Setting Up

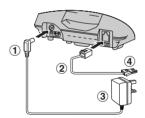

Please ensure the batteries are inserted as shown.

Connection

Plug in the AC adaptor and the telephone line cord in order (1), (2), (3).

WARNING:

DO NOT CONNECT THE TELEPHONE LINE CORD TO THE PHONE SOCKET ④ UNTIL THE HANDSET IS FULLY CHARGED.

• Fasten the AC adaptor cord to prevent it from being disconnected.

The AC Adaptor must remain connected at all times. (It is normal for the adaptor to feel warm during use).

Location

For maximum distance noise-free operation, place your base unit:

-Away from electrical appliances such as TV, radio, personal computer or another phone.

-In a convenient high and central location.

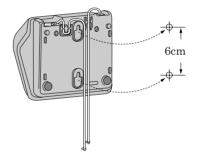

Wall Mounting

0

This unit can be mounted on a wall. Insert screws into wall. The centres of the screw holes should be 6cm vertically apart.

Connect the AC adaptor and the telephone line cord.

Arrange the wires as shown, then mount the unit.

Notice

Ο

Some features described in these operating instructions/quick guide are dependent upon subscription to your Network provider (e.g Caller ID).

All features of this type will be marked throughout the manual with this icon.

Please note throughout this operating instructions/quick guide that the word "PRESS" is depicted by this symbol

Battery Charging

(Before Initial Use)

! The batteries must be charged for approximately 15 hours before initial use.

After the batteries have been inserted into the handset, place the handset in the powered up base unit. (The telephone line cord must not be connected to the telephone socket at this time. Please leave your standard telephone connected until battery charging is complete).

The batteries are fully charged only when **I** is flashing.

(After Initial Use)

O When the battery icon flashes (and, if programmed, battery low alarm sounds), the handset should be charged immediately because there is little energy left in the batteries.

Battery Life

0

Battery life is dependent on use and conditions but in general when using fully charged Ni-MH batteries: Talk time: 20hrs approx. Standby time: 200hrs approx. When using Ni-Cd batteries (based on 800mA per hour) Talk time: 12hrs approx. Standby time: 100hrs approx. (Times indicated are for peak performance) The batteries reach peak performance after several full charge / discharge cycles. The batteries cannot be overcharged unless they are repeatedly removed and replaced.

0 If battery life is shortened then please check that battery and charge terminals are clean.

For maximum battery life it is recommended that the handset is not recharged until battery icon flashes (

Replacing the batteries

If the **III** icon flashes after a few telephone calls even when the handset batteries have been fully charged, the batteries must be replaced.

! Charge new batteries for approximately 15 hours before initial use.

- (The telephone line cord must not be connected to the telephone socket at this time).
- 0 If the batteries are removed, the battery icon is reset to **L** (less than 30% capacity). In this case, even if fully charged batteries are fitted, the icon remains as 💶 until a full charge cycle is complete.
- On replacing the batteries, ensure 0 that the correct battery type is selected (see 'Handset Settings').

Turning the Power ON/OFF

Turn Power ON

⇒ and hold **≯**.

When button is released, display changes to the standby mode and a confirmation tone sounds.

Turn Power OFF

0

From the standby mode, \bigcirc and hold 🛪 until a long tone sounds.

The display goes blank. If you put the handset in the base unit. the battery icon will display.

Answering Calls

When the phone rings. \mathbb{O} , \mathbb{O}

When an external call is incoming. you can temporarily turn off the handset ringer.

During an incoming call, \bigcirc and hold $\mathbf{\nabla}$. \mathbf{A} is displayed and the handset ringing stops. (This function will not work when the handset is on the base unit or if an internal call is incoming.)

Using the Telephone

Ο

(**)**

Dial the number.

After a few seconds, the call duration is displayed. The dialled number is stored in the redial memory.

When you are finished with the call, \Im π .

- If you misdial, (>C).
- If ♥ flashes and an alarm tone sounds when you press ➤, move closer to the base unit and try your call again.

Setting the Receiver Volume

○ During a phone call, S ▲ or ♥ to change the volume setting to LOW (0), MEDIUM (00) or HIGH (000).

Handset Locator / Paging

Using this feature you can locate a misplaced handset by paging.

- (Souther the base unit. All handsets ring for 1 minute.
- (Sold again or (Sold on (one of) the handset(s) to stop ringing.

Redialling

Redial Number Solution The last

Redialling the Last Number Dialled

The last number dialled displays and is dialled.

Making a Call from the Redial List

The last 10 numbers dialled are stored.

From the standby mode (Some). (Some) or (To select number. (To exit the redial list, (Some)). (Some).

Caller ID Service

 \overline{C}

Caller ID is a service of your Network provider and will only operate if you have subscribed to this feature.

After subscribing to Caller ID, this phone will display the callers information.

If your unit is connected to a PBX or a telephone line that does not support this service you will not be able to use it.

Caller ID does not display caller information while using the handset for an intercom call. However, the caller's information will be stored to the Caller ID List.

Making a Call from the Caller ID List

The last 50 caller's phone numbers are stored in the order the calls were received.

○ From the standby mode
 ◇ ▲ or ♥.

The newest number is displayed.

• If there are no numbers stored in the Caller ID list *NO IEEN* is displayed.

\bigcirc \bigcirc \bigcirc or \bigcirc to select number.

- Solution to scroll to previous calls and (a) to the most recent calls.
- Only the most recent call from the same phone number is stored.
- Only 12 digits of a phone number are displayed. To display the remaining digits of longer phone numbers, () (3).

On selection 🔊 🔨

Making a Call from the Caller ID List (cont.)

After you have viewed a phone number, answered the call or called back the caller, "o" is added to the caller's number.

After viewing all new Caller ID numbers, the call counter is reset to zero.

To exit the Caller ID list 🗇 🛪.

Caller ID List Menu / Redial List Menu

You can save numbers from the redial list/Caller ID list into speed dial, edit or clear from memory.

- From the standby mode () (to access Redial list) or () a or () (to access Caller ID list).
- Solution or to select number from list.
- 🗫 .

SRUE SPEEd is displayed.

Hot Key

Using the Telephone

Key Lock

You can lock the handset dialling buttons. Only incoming calls are accepted while the key lock is ON.

Turn Key Lock ON

S and hold ■ until a beep sounds. '¬O' is displayed and all dialling buttons are locked.

! When the key lock is ON, emergency calls cannot be made until key lock is cancelled.

Turn Key Lock OFF

The key lock is also cancelled if the handset is turned off.

Recall Feature

•

0

(R) is used to access special telephone services. Contact your Network provider for details. If your unit is connected to a PBX, pressing (R) allows you to access some features of your host PBX such as transferring an extension call (Refer to 'TBR' in 'Base Unit Settings').

Call Waiting

Call Waiting is a service of your Network provider and will only operate if you have subscribed to this service.

After subscription, your handset displays a second caller's phone number while talking and a Call Waiting tone is heard.

You can answer the second call, keeping the first call on hold.

Please consult your Network provider for details of this service.

Dialling Pause

! This function is for PBX line/long distance service users.

A dialling pause is used when a pause in the dialling of the phone number is necessary using a PBX or accessing a long distance service. (see "Select Pause Timing").

For example, when 9 (line access number) is dialled followed by a pause to access an outside line through a PBX:

C

C

0

 \mathbf{S} (*P*' is displayed on the LCD).

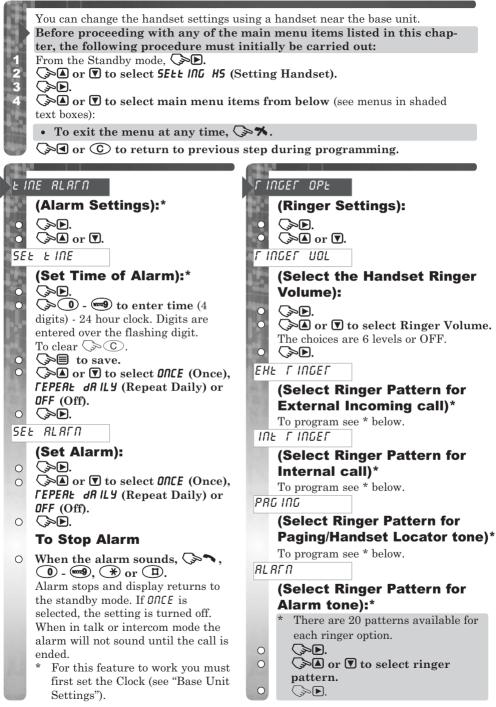

Enter telephone number. \bigcirc \bigcirc \checkmark .

• Entering a pause prevents misdialling when you redial or dial a stored number.

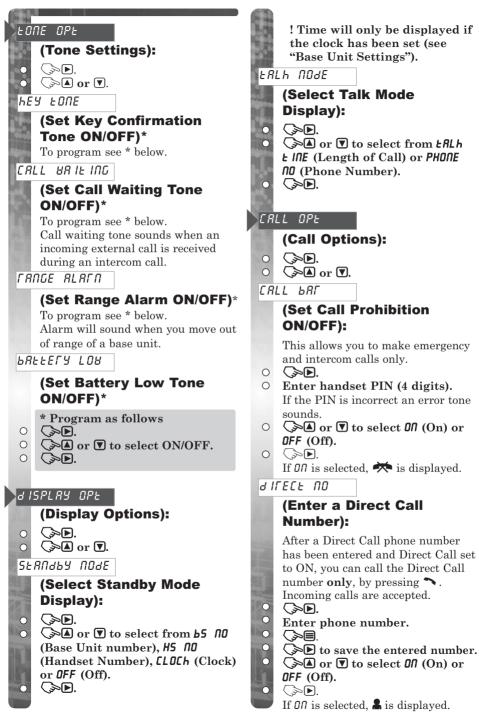

• Pressing () once creates one pause. To extend the pause requirement time, () () accordingly.

Operating Additional Handsets

Additional KX-A120E handsets are available to purchase separately. Up to 6 handsets can be registered to a single base unit. Using additional handsets allows you to have an intercom call while simultaneously on another handset conducting a call to an outside line.

Operating Additional Base Units

It is not possible to transfer calls between bases (only between handsets linked to the same base unit).

NOTE: Calls are disconnected when the handset moves from one radio cell to another.

Registering a Handset to a Base Unit

The handset supplied with the base unit is already registered. If an optional handset is purchased, it must be registered as follows.

! Charge the optional handset batteries for 15 hours before initial use.

- From the Standby mode, 🗫 🗈.
- (Setting Handset).
- 3 ⊊≫┣.

2

- 4 🗇 or 🛡 to select:
- *ГЕ* 6 ISE Г ЯЕ ION
 - (Registration):
- 5 🖓 🔊
- register Hs

(Register Handset):

- 🖓►.
- (and hold) on the base unit for 10 seconds. A base registration tone sounds.
 - ! Handset must be registered
 within 1 minute. If over 1 minute
 S ★ then restart registration.
- $\bigcirc \quad \textbf{(base 1-4).}$
- 🖓 🕨.
- Enter base unit PIN (4 digits factory preset is 0000).
- 🖓 🕨.
 - When handset and base unit connect a confirmation tone sounds.
 - If handset registration is not successful within 5 minutes, an error tone sounds.

Cancelling a Handset

Each handset can cancel itself or another handset.

- From the standby mode, \bigcirc \triangleright .
- \square or \square to select SELL ING bS.
- 0 when INPUL COdE is displayed.
- 0 Enter base unit PIN (4 digits).
- (> 1) to select handset 0 to cancel.
- 0

0

Cancelling a Base Unit

Follow steps 1 to 5 of "Registering a Handset to a Base Unit". then:

 \bigcirc or \bigtriangledown to select:

СЯЛСЕЬ ЪЯЅЕ

0

(Cancel a Base Unit)

You can cancel any base unit that your handset is registered to. S>►.

- Enter handset PIN (4 digits). 0
- S ▲ or ▼ to select base unit(s) 0 to cancel.
- \mathbf{F} to set selection. 0

Selected base number(s) flash(es).

- ि≫▶.
- ПО (No).
- \bigcirc \bigcirc **b** to confirm selection.

If selection was YES, CLERFED is displayed briefly.

Selecting a Base Unit

When RUED (Automatic Base Unit Access) is selected, if you move outside of the radio range of the current base unit the handset automatically searches for other registered bases.

When a specified base unit is selected, the handset will access that base unit only.

Follow steps 1 to 3 of "Registering a Handset to a Base Unit", then:

 \square or \blacksquare to select:

SELECE bS

(Select Base Unit):

(≫▶.

0 \square or \blacksquare to select *AULO* or a specific base unit 1 -4 (only registered base unit numbers are displayed).

0 \mathbf{B} to confirm selection.

> Calls (both incoming and outgoing), can be conducted only via the selected base unit, even if the radio cells overlap with neighbouring base units.

Intercom Between Handsets

You can use your handsets as a 2-way intercom. For example, when Handset 1 calls Handset 2:

Handset 1-

0

0

0

0

Sm . M blinks.

(Jack Carl (desired handset number).

Handset 2 (ringing) -

 $rac{}{\gg}$ to answer.

Handset 1 and 2 -

- $rac{1}{2}$ to end the call.
- ! Intercom calls can be conducted within the radio cell of the current base unit, but not with units in neighbouring radio areas.

Transferring Calls to Another Handset

The intercom can be used during a call to transfer an external call between handsets that are registered to the same base unit.

For example, when handset 1 transfers a call to Handset 2:

Handset 1 -

During the call, (Som). (1) is displayed and the call is put on hold.

(desired handset number).

A ring back tone is heard until Handset 2 answers.*

Handset 2 (ringing) -

Handset 1 & Handset 2 -

 \bigcirc (Have conversation).

Handset 1 -

 \bigcirc

State of the call for transfer OR

Sto connect to external caller again.

To transfer the call directly, without speaking to the other handset:

Handset 1 -

🗇 🏞 at *.

Handset 2 -

(Jon • • .

The transfer is complete.

If the transferred call is not answered within 30 seconds, Handset 1 will ring again. (>> to answer the call.

Conference Calls

During a conversation in an external call, you can make an intercom call to another handset and then combine the calls together to establish a conference call:

Handset 1 -

During the call, (>(M) then (>(2) (desired handset number). The call is put on hold.

If there is no answer, $s \in \mathbb{N}^{T}$ to return to the caller.

Handset 2 (ringing) -

Handset 1 -

0

 \bigcirc

to establish the conference call.

Handset 1 or Handset 2 -O Store to end the conference call.

Before Requesting Help

If you experience any problems with the normal use of your apparatus, you should unplug it from the telephone outlet and connect a known working telephone in its place. If the known working telephone still has problems, then please contact the customer service department of your Network provider. If it operates correctly, then the problem is likely to be a fault in your apparatus. In this case, contact your supplier for advice. Your Network provider may charge you if they attend a service call that is not due to apparatus supplied by them.

Problem	Possible cause	Solution
NO LCD display in handset.	• Handset not turned on.	• Turn on power (pg. 4).
Handset will not turn on.	• Batteries not inserted.	• Insert x 2 rechargeable batteries supplied (pg. 3).
	• Batteries not charged.	• Place handset in base and connect AC adaptor to base and AC outlet (full charge period 15 hrs).

Technical Information

Specifications:

Standard:	DECT=(<u>D</u> igital <u>E</u> nhanced <u>C</u> ordless
	<u>T</u> elecommunications).
	GAP=(<u>G</u> eneric <u>A</u> ccess <u>P</u> rofile).
Number of channels:	120 Duplex Channels.
Frequency range:	1.88 GHz to 1.9 GHz.
Duplex procedure:	TDMA (Time Division Multiple Access).
Channel spacing:	1728 kHz.
Bit rate:	1152 kbit/s.
Modulation:	GFSK.
RF Transmission Power:	approx. 250mW.
Voice coding:	ADPCM/32kbit/s.
Operating range:	Up to 300m outdoors (line of sight), up to
	50 m indoors.
Power source:	AC Adaptor 220-240 V AC~50/60Hz.
Power consumption, base unit:	5 VA.
Operating conditions:	5° - 40°C, 20 - 80% relative air humidity (dry)
Dimensions, Base Unit:	About 103mm x 122mm x 60mm x 180g
Dimensions, Handset:	About 134mm x 46mm x 30mm x 85g
	(without batteries)
Telephone line cord length:	About 2.3m
AC adaptor cord length:	About 1.9m

• Specifications are subject to change.

• The illustrations used in this manual may differ slightly from the original device.

Connections:

• The telephone will not work during a power failure.

We therefore recommend you use a standard telephone and T Adaptor to connect this Digital Cordless Phone to the line. Your Panasonic Sales Shop can offer you more information about connection possibilities.

Guarantee

CONDITIONS OF GUARANTEE

This guarantee is in addition to and does not in any way affect any statutory or other rights of consumer purchasers. If within the applicable guarantee period, the appliance proves to be defective by reason of faulty design, workmanship or materials, we undertake subject to the following conditions to have the defective appliance (or any part or parts there of) repaired or replaced free of charge.

- 1. The appliance shall have been purchased and used solely within either the UK or ROI and in accordance with standard operating instructions and the technical and/or Safety Standards required in the UK.
- 2. The appliance should be returned together with this guarantee and proof of date of purchase promptly on being found defective at the purchaser's risk and expense to the authorised dealer from whom the appliance was purchased or to the nearest authorised dealer. All enquires must be through such dealers.
- 3. This guarantee shall not apply to damage caused through fire, accident, lightning, misuse, wear and tear, neglect, incorrect adjustment or repair, to damage caused through installation, adaption, modification or use in an improper manner or inconsistent with the technical and/or safety standards required in the country where this appliance is used, or to damage occurred during transit to or from the purchaser.
- 4. If at any time during the guarantee period any part or parts of the appliance are replaced with a part or parts not supplied or approved by us or of an objective quality safe and suitable for the appliance, or the appliance has been dismantled or repaired by any person not authorised by us, we shall have the right to terminate this guarantee in whole or in part immediately without further notice.
- 5. The purchaser's sole and exclusive remedy under this guarantee against us is for the repair or replacement of the appliance or any defective part or parts and no other remedy, including, but not limited to, incidental or consequential damage or loss of whatsoever nature shall be available to the purchaser.
- 6. This guarantee shall not apply to batteries and any other items of limited natural life.
- 7. Our decision on all matters relating to complaints shall be final. Any appliance or defective part which has been replaced shall become our property.
- 8. The guarantee period applicable to this product shall be 12 months.

Please keep these Operating Instructions with your receipt.
