Digital Switchover

Starting in late 2007 and ending in 2012, TV services in the UK will go completely digital, TV region by TV region. If you are missing any channels, it may be that they are not available in your area, or that your aerial needs upgrading.

If you have any questions, please call Digital UK on **08456 50 50 50** or visit **www.digitaluk.co.uk**. Digital Switchover will cover a period of several weeks. When it starts some Digital TV programmes will be missing.

You will need to retune your DVD Recorder each time this happens to recover your digital programmes.

To retune your DVD Recorder → "Auto-Setup Restart" in the Setup menu (→ 61)

Caution for AC Mains Lead

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13- AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as stated below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL \perp OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

2. Replace the fuse and close or attach the fuse cover.

Safety precautions

Placement

Set the unit up on an even surface away from direct sunlight, high temperatures, high humidity, and excessive vibration. These conditions can damage the cabinet and other components, thereby shortening the unit's service life.

Do not place heavy items on the unit.

Voltage

Do not use high voltage power sources. This can overload the unit and cause a fire.

Do not use a DC power source. Check the source carefully when setting the unit up on a ship or other place where DC is used.

AC mains lead protection

Ensure the AC mains lead is connected correctly and not damaged. Poor connection and lead damage can cause fire or electric shock. Do not pull, bend, or place heavy items on the lead.

Grasp the plug firmly when unplugging the lead. Pulling the AC mains lead can cause electric shock.

Do not handle the plug with wet hands. This can cause electric shock.

Foreign matter

Do not let metal objects fall inside the unit. This can cause electric shock or malfunction.

Do not let liquids get into the unit. This can cause electric shock or malfunction. If this occurs, immediately disconnect the unit from the AC mains supply and contact your dealer.

Do not spray insecticides onto or into the unit. They contain flammable gases which can ignite if sprayed into the unit.

Service

Do not attempt to repair this unit by yourself. If sound is interrupted, indicators fail to light, smoke appears, or any other problem that is not covered in these instructions occurs, disconnect the AC mains lead and contact your dealer or an authorized service centre. Electric shock or damage to the unit can occur if the unit is repaired, disassembled or reconstructed by unqualified persons.

Extend operating life by disconnecting the unit from the AC mains if it is not to be used for a long time.

About descriptions in these operating instructions

- Pages to be referred to are indicated as “→ ○ ○”.

HDD (Hard disk drive) handling care

The HDD is a high precision recording instrument and because of its long recording capability and high speed operation it is a very special device that is easily susceptible to damage.

As a basic rule, save important content to a disc as backup.

■ The HDD is a device that is not built to withstand vibration/shock or dust

Depending on the setup environment and handling of the HDD some content may become damaged and play and recording may no longer be possible. Especially during operation, do not subject the unit to any vibration, shock, or remove the AC mains lead from the household mains socket. In the event of a power failure during recording or play, the content may be damaged.

■ The HDD is a temporary storage device

The HDD is not an everlasting storage device for recorded content. Use the HDD as a temporary storage place for one-off viewing, editing, or copying. It is recommended to save the recorded content on a disc or to keep the original data or CDs that they were copied from.

■ Immediately save (backup) all content as soon as you feel there may be a problem with the HDD

If there is an irregularity within the HDD, repetitive strange sounds or problems with picture (block noise, etc.) may result. Using the HDD in this condition may worsen the problem and in the worst case the HDD may no longer be usable. As soon as you notice this type of problem, copy all content to disc and request service. Recorded content (data) on a HDD that has become unusable is unrecoverable.

- When the unit is turned on or off, there may be an unexpected sound. This does not indicate a problem with this unit.

■ Setup precautions

- Do not place in an enclosed area where the rear cooling fan and the cooling vents on the side are covered up.
- Place the unit on a surface that is flat and not subject to vibration or impact.
- Do not place on anything that generates heat like a video cassette recorder, etc.
- Do not place in an area often subject to temperature changes.
- Place in an area where condensation does not occur. Condensation is a phenomenon where moisture forms on a cold surface when there is an extreme change in temperature. Condensation may cause internal damage to the unit.
- Conditions where condensation may occur
 - When there is an extreme change in temperature (moving from a very hot location to a very cold location, or vice versa, or when subjected to an air conditioner or when cooled air directly impacts the unit). When the HDD (warms during operation) is subjected to cold air, condensation may form on the inside of the HDD and may cause damage to the HDD heads, etc.
 - When there is high humidity or a lot of steam in the room.
 - During the rainy season.

In the above situation, **without turning the unit on**, let the unit adjust to the room temperature and wait 2–3 hours until condensation is gone.

■ Cigarette smoke etc. causes malfunction or breakdown

The unit may breakdown if cigarette smoke or bug spray/vapor, etc. gets inside the unit.

■ While operating

- Do not move the unit or subject to vibration or impact. (The HDD may become damaged.)
 - Do not remove the AC mains lead from the household mains socket, or flip the power breaker switch.
- While the unit is on, the HDD is rotating at high speed. Sound or movement due to rotation is normal.

■ When moving the unit

- ① Turn the unit off. (Wait until “BYE” disappears from the display.)
- ② Remove the AC mains lead from the household mains socket.
- ③ Move only after the unit has come to a complete stop (approx. 2 minutes) in order to avoid subjecting to vibration and shock. (Even after turning the unit off, the HDD continues operating for a short time.)

■ HDD recording time remaining

This unit records using a VBR (Variable bit rate) data compression system to vary recorded data segments to match video data segments which may cause differences in the displayed amount of time and space remaining for recording.

If the remaining amount of time is insufficient, delete any unwanted titles to create enough space before you start recording. (Deleting a playlist will not increase the amount of time.)

■ Indemnity concerning recorded content

Panasonic does not accept any responsibility for damages directly or indirectly due to any type of problems that result in loss of recording or edited content (data), and does not guarantee any content if recording or editing does not work properly. Likewise, the above also applies in a case where any type of repair is made to the unit (including any other non-HDD related component).

Remote Control Information/Unit Care

Remote Control Information

About batteries

- Insert so the poles (+ and -) match those in the remote control.
- Do not use rechargeable type batteries.

- Do not mix old and new batteries.
- Do not use different types at the same time.
- Do not heat or expose to flame.
- Do not leave the battery(ies) in an automobile exposed to direct sunlight for a long period of time with doors and windows closed.
- Do not take apart or short circuit.
- Do not attempt to recharge alkaline or manganese batteries.
- Do not use batteries if the covering has been peeled off.

Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

Using the remote control

Aim at the sensor, avoiding obstacles, up to a maximum range of 7 m directly in front of the unit.

Unit Care

The precision parts in this unit are readily affected by the environment, especially temperature, humidity, and dust. Cigarette smoke also can cause malfunction or breakdown.

To clean this unit, wipe with a soft, dry cloth.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, carefully read the instructions that came with the cloth.

Observe the following points to ensure continued listening and viewing pleasure.

Dust and dirt may adhere to the unit's lens over time, making it impossible to record or play discs.

Use the **DVD lens cleaner** (not included) about once every year, depending on frequency of use and the operating environment. Carefully read the lens cleaner's instructions before use.

DVD lens cleaner: RP-CL720E

DO NOT

Do not place the unit on amplifiers or equipment that may become hot.

The heat can damage the unit.

Select a position with good ventilation when installing the unit. Do not block the cooling fan on the rear of the unit.

Before moving the unit, ensure the disc tray is empty. Failure to do so will risk severely damaging the disc and the unit.

The manufacturer accepts no responsibility and offers no compensation for loss of recorded or edited material due to a problem with the unit or recordable media, and accepts no responsibility and offers no compensation for any subsequent damage caused by such loss.

Examples of causes of such losses are

- A disc recorded and edited with this unit is played in a DVD Recorder or computer disc drive manufactured by another company.
- A disc used as described above and then played again in this unit.
- A disc recorded and edited with a DVD Recorder or computer disc drive manufactured by another company is played in this unit.

Basic Connection

Use of the RF coaxial cable

- Keep the RF coaxial cables as far away as possible from other cables.
- Do not roll up the RF coaxial cables.

- Before connection, turn off the mains for all connected equipment and read the appropriate operating instructions.
Be sure to read the Caution for AC Mains Lead on page 3.

Connecting to a Television only

Connections other than the 21-pin Scart cable ▶ 12, 69

- 1 Aerial cable to the "RF IN" on the unit.
- 2 RF coaxial cable (included) from the "RF OUT" on the unit to the "RF IN" on the TV.
- 3 21-pin Scart cable from the "AV1 (TV)" on the unit to the "AV" on the TV.
- 4 AC mains lead (included) from the "AC IN~" on the unit and the TV to a household mains socket.

After completing the above connections, proceed to the TV Tuning (→ 13).

Using a fully wired 21-pin Scart cable

- You can use a variety of Q Link functions by connecting the unit to a Q Link compatible television (→ 40).
- You can enjoy high-quality viewing by connecting the unit to an RGB compatible television.
“AV1 Output” in the Setup menu is set to “RGB 1 (without component)” or “RGB 2 (without component)” (→ 65).
- “AV2 Input” settings in the Setup menu (→ 65).

- **Before connection, turn off the mains for all connected equipment and read the appropriate operating instructions.**

Be sure to read the **Caution for AC Mains Lead** on page 3.

Adding a Satellite Receiver: Connecting to a Television and a Satellite Receiver

Connections other than the 21-pin Scart cable ▶ 12, 69

- 1 Aerial cable to the “RF IN” on the unit.
- 2 RF coaxial cable (included) from the “RF OUT” on the unit to the “RF IN” on the TV.
- 3 21-pin Scart cable from the “AV1 (TV)” on the unit to the “AV” on the TV.
- 4 21-pin Scart cable from the “AV” on the satellite receiver to the “AV2 (EXT)” on the unit.
- 5 AC mains lead (included) from the “AC IN~” on the unit, the TV and the satellite receiver to a household mains socket.

After completing the above connections, proceed to the TV Tuning (→ 13).

To view satellite programmes

Refer to “Watching Satellite Programmes” (→ 18)

To record satellite programmes

Refer to “Recording from a Satellite Receiver” (→ 27)

Basic Connection

- You can enjoy high-quality picture by adding the HDMI cable connection to the 21-pin Scart cable connection between this unit and your TV on page 10, 11.

Connecting to a TV with an HDMI (High Definition Multimedia Interface) Cable

When connected to an HDMI compatible unit, an uncompressed digital audio and video signal is transmitted, enabling you to enjoy high quality, digital video and audio with just one cable. When connecting to an HDMI-compatible HDTV (High Definition Television), the output can be switched to 1080p, 1080i or 720p HD video.

- **This unit incorporates HDMI™ (V.1.3 with Deep Colour) technology** that can reproduce greater colour gradation (4096 steps) when connected to a compatible TV.
A lower colour gradation (256 steps), without deep colour, will be reproduced if connected to a TV which does not support deep colour.
The unit will automatically set appropriate output to suit the connected TV.
- Video sources converted to 1920×1080 resolution, while of high quality, will exhibit somewhat lower subjective image resolution than true, native 1080p full-HD sources. See dealer for details.
- Please use High Speed HDMI Cables that have the HDMI logo (as shown on the cover).

Regarding VIERA Link “HDAVI Control™” function

When connecting with a Panasonic TV (VIERA) or a receiver equipped with the “HDAVI Control” function, linked operations would be possible. [→ 40, Linked Operations with the TV (VIERA Link “HDAVI Control™”/Q Link)]

- It is recommended that you use Panasonic’s HDMI cable.
Recommended part number: RP-CDHG10 (1.0 m), RP-CDHG15 (1.5 m), RP-CDHG20 (2.0 m), RP-CDHG30 (3.0 m), RP-CDHG50 (5.0 m), etc.
- Non-HDMI-compliant cables cannot be utilised.

- Set “Digital Audio Output” to “HDMI and Optical” (→ 65).
(The default setting is “HDMI and Optical”.)
- To enjoy High Quality Video up-converted to 1080p, you need to connect the unit to 1080p compatible HDTV and set “HDMI Video Format” in the Setup menu to “1080p” (→ 65).

Notes

- If connecting to equipment that is only audio compatible with 2 channel audio output, audio with 3 channels or more will be down-mixed (→ 84) and output as 2 channels, even if connecting with an HDMI cable (some discs cannot be down-mixed).
- For display units compatible with HDCP (High-Band width Digital Content Protection) that are equipped with a digital DVI input terminal (PC monitors, etc.):
Depending on the unit, picture may not display properly or at all when connecting with a DVI/HDMI switching cable (audio cannot be output).

Setting the Channels and Clock

Preparation:

- Turn on the mains for the television (and connected equipment) and select the appropriate AV input to suit the connections to this unit.
- These are the first settings you make upon buying the unit. You don't need to make these settings again.

TV's remote control

1 to turn the unit on.

DVB Auto-Setup starts. The unit will search for the digital terrestrial channels. This takes about 5 minutes.

2 Power Save Function:
▲, ▼ to select "On" or "Off" then

- Set to "On" to reduce power consumption in standby mode.
- Refer to the following chart for the Power Save function features when the unit is turned off.

Power Save	On	Off
Power consumption	Approx. 2 W	Approx. 13 W
Watching the picture from the satellite receiver connected to the AV2 terminal	Cannot do	Can do
Startup time	Not quick	Quick*
Front display	Turns off	Stays lighted

*e.g., GUIDE Plus+ list is displayed within 1 second after [GUIDE] is pressed while the unit is off.

3 When setup has completed, the confirmation screen appears.

4 The Owner ID settings screen appears. and press the numbered buttons to enter your choice of a 4-digit PIN number.

Make a note of the PIN number (don't forget), as it is not possible to return to the factory preset.

5 to store the PIN number.

(continued on the next page)

Tips

To cancel Auto-Setup
Press [RETURN].

- If the unit displays "No stations found !"
Press [▶] to select "No" and press [OK]. Go to step 2. After you have performed steps 2-11, turn off the unit and confirm the cable or aerial input is connected to the RF IN terminal. Restart the Auto-Setup again (→ 61).
- If the clock setting menu appears or the clock is not correct, set the clock manually (→ 14).

Restarting the Auto-Setup (→ 61)

To correct the PIN number

1. Press [◀, ▶] to select the digit.
 2. Press the numbered buttons to enter the digit.
- When this unit is not operated for approximately 5 minutes while the screen is being displayed, the screen saver may be displayed. You can turn this function off (→ 64, "Screen Saver").

Setting the Channels and Clock

6 ◀ to select “Yes”, then 
The cursor moves to “Name”.

7 ▶ to enter the name.

8 ▲, ▼ to select a letter, then ▶ to move to next character.
Repeat this to enter the name.

9  to store the name.

10 ▼ and ▶ and then repeat steps **8**, **9** to enter and store “House No.” and “Postcode”.

11 
The Owner ID settings screen disappears.

- Auto-Setup for your unit is complete. You can now make your favourite channels and store them in the required order in the profiles. (→ 60)

Tips

To correct the character

1. Press [◀, ▶] to select the character.
2. Press [▲, ▼] to correct the character.

To display the Owner ID information on TV

Press and hold [■] on the main unit for more than 5 seconds.
The PIN number is not displayed.
After 30 seconds this menu automatically disappears.

Clock Setting

This unit usually obtains time and date information from digital broadcasts and automatically corrects the time several times a day.

However, if the clock is not set correctly, adjust the clock.

- In the case of a power failure, the clock setting remains in memory for approximately 60 minutes.

1 With the unit stopped

2 ▲, ▼ to select “To Others”, then 

3 ▲, ▼ to select “Setup”, then 

4 ▲, ▼ to select “Others”, then ▶.

5 ▲, ▼ to select “Clock”, then 

6 ▲, ▼ to select “Off” of “Automatic”, then 

7 ◀, ▶ to select the item you want to change.
The items change as follows:
Hour↔Minute↔Second↔Day↔Month↔Year

8 ▲, ▼ to change the setting.
You can also use the numbered buttons for setting.

9  to confirm new date and time and to initiate the clock.

Tips

To return to the previous screen

Press [RETURN].

To exit the screen

Press [EXIT].

Notes

If a TV station transmits a time setting signal, and when “Automatic” in the Clock setting menu is set to “On”, the automatic time correction function checks the time and if necessary it is adjusted several times every day.

For available recording times for different discs under different recording modes, see "Recording Modes and Durations" on page 24.
- Formatting and/or recording/initializing constraints may prevent you from playing or recording certain discs.

- Please see specifications (→ 86) for compatible disc versions and recording speeds.

Notes

- **RAM** will show an increase in available space whenever a title has been erased.
- **-RW(V)** and **+RW** discs will only show an increase in available space when their last title has been erased.
- **-R -R DL +R +R DL** The discs will show no increase in available space after deleting titles.
- You may not be able to record depending on the condition of the discs and you may not be able to play them due to the condition of the recording.

You cannot directly record to a DVD-R DL and +R DL disc on this unit.

Record to the HDD and then copy to the disc.

When playing DVD-R DL (Dual Layer, single-sided) and +R DL (Double Layer, single-sided)

DVD-R DL (Dual Layer, single-sided) and +R DL (Double Layer, single-sided) discs have two writable layers on one side. If there is not enough space on the first layer to record a programme, the remainder is recorded on the second layer. When playing a title recorded on both layers, the unit automatically switches between layers and plays the title in the same way as a normal programme. However, video and audio may momentarily cut out when the unit is switching layers.

Notes

-R -R DL CD

- Compatible formats: ISO9660 level 1 or 2 (except for extended formats) and Joliet
- This unit is compatible with multi-session; however, reading or play of the disc may take time if there are a lot of sessions.
- Operation may take time to complete when there are many files (tracks) and/or folders (groups); some files (tracks) may not display or be playable.
- Images recorded at a very high resolution may take a long time to display.
- English alphabetical characters and Arabic numerals are displayed correctly. Other characters may not display correctly.
- The display order on this unit may differ from how the order is displayed on a computer.
- Depending on how you create the disc (writing software), files (tracks) and folders (groups) may not play in the order you number them.
- This unit is not compatible with packet-write format.
- Depending on the recording conditions, the disc may not play.

Tips

You can play MP3s and still pictures (JPEG) on this unit by making folders as shown below. However depending on the method of writing data (writing software), play may not be in the order you number the folders.

Structure of MP3 folders

-R -R DL CD

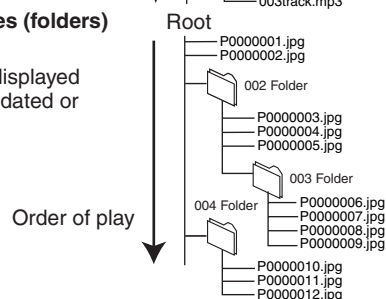

Prefix with 3-digit numbers in the order you want to play them.

Structure of still pictures (folders)

-R -R DL CD

Files inside a folder are displayed in the order they were updated or taken.

Disc Handling

Inserting Discs

- 1 Press [**▲ OPEN/CLOSE**] to open the tray.
 - Insert a disc.

Insert label-up.

- 2 Press [**▲ OPEN/CLOSE**] to close tray.

Notes

- When using 8 cm DVD-RAM or 8 cm DVD-R, remove the disc from the cartridge.
- It is not possible to record or play continuously from one side of a double sided disc to the other. You will need to eject the disc and turn it over.

Automatic drive select function

RAM [Only for discs with the write-protect tab on the cartridge set to “PROTECT” (→ 58, Setting Protection)]

DVD-V VCD CD

- If the unit is recording to the HDD or stopped, it automatically switches to the DVD drive when a disc is inserted.
- If you eject a disc and close the disc tray, the HDD drive is automatically selected.

Disc Care

RAM Use cartridges to protect them from scratches and dirt.

Holding a disc

Handle discs by the edges to avoid inadvertently scratching or getting oil from your fingers on the disc. Do not touch the signal surface of discs (the shiny side).

Cleaning discs

Discs are not indestructible and occasionally dirt or condensation may appear. Clean by gently wiping with a soft, dry lint-free cloth in a straight line from the centre of the disc to the edge of the disc. Return discs to their cases when not in use; this helps to protect against scratches and dirt.

Storing discs

- Do not place or store discs in the following locations:
 - Direct sunlight
 - Very dusty or humid areas
 - Near a heat source
 - Places that undergo extreme shifts in temperature (condensation can occur)
 - Where static electricity or electromagnetic waves occur

Discs to avoid

- Discs that are not perfectly circular in shape
- Warped discs, which may not balance properly in your unit, causing improper operation or damage to the unit
- Cracked discs
- Discs with exposed adhesive (from removed stickers or labels, such as may occur with rental discs or improperly cared-for discs that were previously labeled or re-labeled)

Watching Television

Refer to “GUIDE Plus+ system” (→ 32) for detail information.

Timer Recording

What is Freeview Playback?

Freeview Playback is the functions that enable timer recordings be controlled by the signal sent from the broadcaster. "Guide Link", "Series recording" (→ 29), and "Split Programme" are available.

"Guide Link" — If you set a timer recording from the TV Guide, the recording's start and stop times can be controlled by the broadcaster, e.g. delayed start.

This is indicated by "Guide Link" in the Timer Recording screen in step ② (→ below).

"Split Programme" — If a programme is separated into 2 or more parts by some other programmes e.g. news, this unit pauses recording during the gap.

This is indicated by "Split" in the Timer Recording screen in step ② (→ below).

When setting timer from the 1st split programme, other parts of the programme will be automatically set and indicated by the timer mark on the TV Guide, but not shown on the timer recording list.

If you set a timer recording from the TV Guide, the recording's start and stop times are controlled by the signal sent from the broadcaster. If the signal is not sent correctly, the recording may lack the beginning or the ending part of the programmes.

In order to make the timer recording work successfully, we recommend you set the start time earlier and the end time later by some minutes, up to a maximum of 10 minutes for Guide Link to function.

e.g. When you set the timer recording for a programme that will start at 10:00 and end at 11:00, set "9:58" and "11:05" in step ③ (→ below).

HDD RAM -R -RW(V) +R +RW

Preparation:

- Turn on the television and select the appropriate video input to suit the connections to this unit.
- Turn on this unit.
- If recording to DVD, insert a disc that you use for recording (→ 15).

Copy-once recording

It is not possible to record the broadcasts that allow "One time only recording" onto DVD-R, DVD-RW, +R, +RW or 8 cm DVD-RAM discs. Use the HDD or CPRM (→ 84) compatible DVD-RAM.

RAM CPRM compatible discs only

12 cm

HDD

-R -RW(V) +R +RW

(○: Can do, —: Cannot do)

- "One time only recording" titles can only be transferred from the HDD to CPRM compatible DVD-RAM (They are deleted from the HDD). They cannot be copied.
- Even when copying to videotape the title may not be copied correctly because of the copy guard.
- You cannot copy a playlist created from "One time only recording" titles.

Playing the disc on other DVD players

-R -R DL -RW(V) +R +R DL

The disc must be finalised after recording or copying (→ 59).

It is necessary to finalise DVD-R, etc. on this unit after recording or copying titles to them. You can then play them as a commercially sold DVD-Video. However, the discs become play-only and you can no longer record or copy.*

* You can record and copy again if you format DVD-RW.

Record to DVD-R, etc.

Play on other DVD equipment

+RW

If the disc failed to play on other equipment, we recommend you create top menu (→ 59).

Recording to DVD-R DL and +R DL

You cannot directly record to a DVD-R DL and +R DL disc on this unit.

Record to the HDD and then copy to the disc.

- It is not possible to record to both HDD (Hard Disk Drive) and DVD drive simultaneously.

Recording Modes and Durations

Recording Mode	HDD (160 GB)	DVD-RAM		DVD-R, DVD-RW, +R, +RW (4.7 GB)	DVD-R DL ^{※3} (8.5 GB)	+R DL ^{※3} (8.5 GB)
		Single-sided (4.7 GB)	Double-sided ^{※1} (9.4 GB)			
XP (High quality)	35 hours	1 hour	2 hours	1 hour	1 hour 45 minutes	1 hour 45 minutes
SP (Standard play)	70 hours	2 hours	4 hours	2 hours	3 hours 35 minutes	3 hours 35 minutes
LP (Long play)	140 hours	4 hours	8 hours	4 hours	7 hours 10 minutes	7 hours 10 minutes
EP (Extra long play) ^{※4}	279 hours (209 hours ^{※2})	8 (6 ^{※2}) hours	16 (12 ^{※2}) hours	8 (6 ^{※2}) hours	14 hours 20 minutes (10 hours 45 minutes ^{※2})	/
FR (Flexible Recording) ^{※4}	279 hours maximum	8 hours maximum	8 hours maximum for one side	8 hours maximum	14 hours 20 minutes	

^{※1} It is not possible to record or play continuously from one side of a double sided disc to the other.

^{※2} When "Recording time in EP mode" has been set to "EP (6Hours)" in the Setup menu (→ 62).

The sound quality is better when using "EP (6Hours)" than when using "EP (8Hours)".

^{※3} You cannot record directly to DVD-R DL and +R DL discs with this unit. The table shows the recording time when copying.

+R DL You cannot copy in "EP" or "FR (recordings 5 hours or longer)" mode.

^{※4} When recording to the HDD in "EP" or "FR (recordings 5 hours or longer)" mode, you cannot perform high-speed copy to +R, +R DL or +RW discs.

Notes

- This unit uses variable bit rate (VBR) recording which varies the amount of data recorded to suit the picture quality, so actual recording times and remaining recording times shown by the unit will be different. (**-R DL** **+R DL** The difference will be especially noticeable.)
Use a disc enough remaining blank space.
- When recording to DVD-RAM using EP (8Hours) mode, play may not be possible on DVD players, even if they are compatible with DVD-RAM. In this case use EP (6Hours) mode.

Tips

- Maximum number of titles to a disc

HDD 499 titles on HDD

RAM -R -R DL -RW(V) 99 titles on a disc

+R +R DL +RW 49 titles on a disc

- FR (Flexible recording mode)**

Using "Flexible Recording" is convenient in these kinds of situations:

RAM -R -RW(V) +R +RW

- When the amount of free space on the disc makes selecting an appropriate recording mode difficult
- When you want to record a long programme with the best picture quality possible

HDD

- When you want to record a title to HDD so that it can then be copied to fit one 4.7 GB disc perfectly
You do not need to edit the recorded title, or change the recording mode when copying, to fit the disc space e.g., Recording a 90 minutes programme to 4.7 GB DVD-RAM disc:

- If you select XP mode, the programme will not fit on one disc.

 A second disc is necessary for 30 minutes of the programme.

- If you select SP mode, the programme will fit on one disc.

However there will be 30 minutes remaining disc space.

- If you select "Flexible Recording" the programme will fit on one disc perfectly.

You can set FR mode when programming timer recordings and flexible recording (→ 26).

When the format confirmation screen is displayed

Formatting is the process of making media such as DVD-RAM recordable on recording equipment.

Important:

Formatting permanently deletes all disc contents (including the contents that have been recorded on a PC), regardless of protection status of disc.

RAM -RW(V) +R +R DL +RW

The following screen may appear when inserting a new disc or a disc that has been recorded on another equipment.

Only format the disc if you intend to use it for recording.

Do not format if you intend to view pre-recorded titles or contents from the disc.

◀ to select "Yes", then

Tips

Refer to "Formatting Discs" (→ 58) for more detail of formatting.

When removing a Recorded or Copied Disc

-R -R DL -RW(V) +R +R DL

After recording or copying, if you press [▲ OPEN/CLOSE] to eject the disc, the following screen may appear.

Finalising

DVD-R, etc. recorded or copied on this unit cannot be played on other players immediately after recording or copying. Using the Finalise feature allows you to play these discs on other players. (However, once the disc is finalised you will no longer be able to record or copy onto the disc.)

- When this unit is in EXT LINK standby (“EXT-L” on the unit’s display lights), recording from TV does not start.
- Programmes are recorded as one title on this unit when the end time of the earlier timer recording and the start time of the later timer recording are close to each other.

To divide the titles, go to “Divide Title” (→ 46).

Notes on timer recording

- When a timer recording is set, DVDs that were recorded using a different TV system cannot be played unless the TV system is changed in the Setup menu (→ 65) or the timer recording has completed or has been cancelled.
- Timer recordings are activated regardless of whether the unit is turned on/off.
- Timer recordings begin when the set time is reached even when playing.
- Timer recordings do not begin while editing or copying in normal speed mode (→ 50).
- If the unit is turned on when timer recording begins, it remains turned on after recording finishes. It does not turn off automatically. You can turn the unit off during timer recording.
- If the unit is not put in the timer recording standby mode at the last 10 minutes before the programmed timer recording starting time, the “⊖” flashes on the unit’s display.
- When you programme successive timer recordings to start immediately one after the other, the unit cannot record the part at the beginning of the later programmes.

- The “Overlapped Timer Recording” screen may be displayed immediately after you turn on this unit, if new overlapping occurred. Refer to “Check, Change, Delete Programmes, or Resolve Overlapping” (→ 30).

Linked Operations with the TV (VIERA Link “HDAVI Control™”/Q Link)

You can enjoy linked operations with the TV and receiver by using “VIERA Link” or Q Link.

What is VIERA Link “HDAVI Control”?VIERA Link

VIERA Link “HDAVI Control” is a convenient function that offers linked operations of this unit, and a Panasonic TV (VIERA) or receiver under “HDAVI Control”. You can use this function by connecting the equipment with the HDMI cable. See the operating instructions for connected equipment for operational details.

- VIERA Link “HDAVI Control”, based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers’ equipment that supports HDMI CEC cannot be guaranteed.
- This unit supports “HDAVI Control 3” function. “HDAVI Control 3” is the newest standard (current as of December, 2007) for Panasonic’s HDAVI Control compatible equipment. This standard is compatible with Panasonic’s conventional HDAVI equipment.
- Please refer to individual manuals for other manufacturers’ equipment supporting VIERA Link function.

Preparation:

1. Connect this unit to your TV using an HDMI cable and a fully wired 21-pin Scart cable (→ 12), or to your receiver using an HDMI cable (→ 70).
2. Set “VIERA Link” to “On” (→ 65). (The default setting is “On”.)
3. Set the “HDAVI Control” operations on the connected equipment (e.g., TV).
 - When using HDMI2 terminal of VIERA as “HDAVI Control”, set the input channel to HDMI2 on VIERA.
4. Turn on all “HDAVI Control” compatible equipment and select this unit’s input channel on the connected TV so that the “HDAVI Control” function works properly.

Also when the connection or settings are changed, repeat this procedure.

What is Q Link?Q Link

Q Link is a convenient function that offers linked operations of this unit and a Panasonic TV. You can use this function by connecting the equipment with a fully wired 21-pin Scart cable.

Preparation:

- Connect this unit to your TV with a fully wired 21-pin Scart cable (→ 10, 11).

Notes

The following systems from other manufacturers have similar function to Q Link from Panasonic.

For details, refer to your television’s operating instructions or consult your dealer.

- Q Link (registered trademark of Panasonic)
- DATA LOGIC (registered trademark of Metz)
- Easy Link (registered trademark of Philips)
- Megalogic (registered trademark of Grundig)
- SMARTLINK (registered trademark of Sony)

○: Can do, -: Cannot do

Important

^{*1} To high speed copy titles (or playlists created from those titles), set "Recording Format" to "Video format" before recording to the HDD (The default setting is "Video format". → 62). However in the following cases, copying to DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R, +R DL and +RW using the high speed mode does not work.

- Playlists created from titles using a variety of recording modes or multiple titles using FR recording mode
- Playlists mixed with a variety of audio types (Dolby Digital and LPCM, etc.)
- Titles that contain many deleted segments
- **+R +R DL +RW** Titles recorded in "EP" mode and "FR (recordings 5 hours or longer)" mode (Displayed **▶▶!** → 51)
- **+R +R DL +RW** Titles recorded in 16:9 aspect
- **-R -R DL -RW(V)** Titles recorded in 16:9 aspect using "EP" mode or "FR" (recordings 5 hours or longer) mode

^{*2} If you select a recording mode with better picture quality than the original, the picture quality does not improve. (However it does prevent against degradation of picture quality.)

+R DL You cannot copy in "EP" or "FR (recordings 5 hours or longer)" mode.

^{*3} You cannot select "Top Menu" or "Auto-Play Select".

If you want to set auto-play select or the background colour, select "Top Menu" or "Auto-Play Select" in "DVD Management" before copying (→ 59).

^{*4} You cannot copy playlists with a play time more than 8 hours.

When you copy a playlist, it will become a title in the destination drive.

^{*5} **RAM -R DL +R DL +RW**: One title becomes one chapter.

-R -RW(V) +R: Chapters are created automatically (**-R -RW(V)** about 5-minutes **+R** about 8-minutes) when finalising after copying the disc.

^{*6} Thumbnails return to the default position.

^{*7} When copying playlists, the thumbnails may not reflect changes made to them.

^{*8} Possible only with titles on the HDD

(However it is not possible when copying with automatic finalisation.)

- You cannot perform chasing play or edit, etc. while copying.

- You cannot play a playlist while copying titles with "One time only recording" restriction (→ 23).

• The above values indicate the quickest possible times and speeds to high speed copy a one hour title recorded on the HDD to a high speed recording compatible disc. Depending on what part of the disc is being written to, the features of the disc, etc., the times and speeds will vary.

*1 In this unit, copying with a 16X Speed DVD-R disc will be performed at the same speed as with a 12X Speed DVD-R disc.

*2 In this unit, copying with a 8X Speed disc, DVD-R DL and +R DL, will be performed at the same speed as with a 4X Speed disc, DVD-R DL and +R DL.

*3 In this unit, copying with a 6X Speed DVD-RW disc will be performed at the same speed as with a 4X Speed DVD-RW disc.

*4 In this unit, copying with a 16X Speed +R disc will be performed at the same speed as with a 8X Speed +R disc.

Notes

- When recording or playing while copying, the unit may not use the maximum recording speed.
- Depending on the condition of the disc, the unit may not copy using the maximum speed.
- When copying titles in high speed mode to high speed recording compatible DVD-RAM 5X, DVD-R 8X, +R 8X or +RW 4X, the sound of the disc rotating becomes louder than normal. If you want copy to perform more quietly, select "Normal (Silent)" in "DVD Speed for High Speed Copy" in the Setup menu (→ 62).

Copy restrictions

Regarding copying to DVD-R DL (Dual Layer, single-sided) and +R DL (Double Layer, single-sided)

When not copying in high speed mode, titles are temporarily copied at normal speed to the HDD and then copied at high speed to DVD-R DL and +R DL. The titles that were temporarily copied to the HDD are then deleted.

You cannot copy to DVD-R DL and +R DL in the following cases.

- When there is not enough free space on the HDD. (When copying to a new blank disc, if you intend to fill a new disc when copying to it, the equivalent of up to 4 hours of free space in SP mode is needed on the HDD.)
- When the number of titles recorded to the HDD and the number of titles to be copied to the DVD-R DL and +R DL is greater than 499 in total.

When playing a title recorded on both layers, video and audio may momentarily cut out when the unit is switching layers. (→ 15)

Regarding copying of the broadcasts that allow "One time only recording"

You can copy a recorded title to a CPRM (→ 84) compatible DVD-RAM, however, the title is deleted from the HDD.

- Titles or playlists cannot be copied from DVD-RAM to the HDD.
- Titles will not be copied if they are protected (→ 46).
- You cannot copy playlists created from "One time only recording" titles.
- Titles with recording limitations and playlists cannot be registered on the same copying list.

Press [OK] to cancel the screen display.

– To confirm the current progress

Press [i STATUS].

Notes

When you stop High-speed copying

All titles that have completely copied at the point cancelled are copied.

When you stop Normal Speed copying

Copies until the point cancelled. However titles with “One time only recording” restriction, only titles that have completely copied at the point cancelled are copied to the disc. Titles that are cancelled before the copy is complete are not copied and remain on the HDD.

– **-R DL +R DL** If copy is cancelled during the step while temporarily copying to the HDD, then nothing will be copied. However, if copy is cancelled during the step while copying to disc from the HDD, then only titles completely copied at the point cancelled are copied.

Even if the title was not copied to the DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R, +R DL or +RW, the amount of remaining writable disc space becomes less.

- Timer recordings executed while copying are recorded to the HDD regardless of the recording drive settings. (Only when high speed copying without finalising)
- To play DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R and +R DL on other players, it is necessary to finalise them after copy.

Copying a finalised DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R and +R DL

DVD-V → HDD

You can copy the content of finalised DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R, and +R DL to the HDD and re-edit. While playing a disc, the content being played is copied to the HDD according to the set time.

- If you perform search, frame-by-frame or pause while copying, that portion of title is not recorded.
- **Operations and on-screen displays during copy are also recorded.**
- Almost all DVD-Video on sale have been treated to prevent illegal copying, and cannot be copied.
- The following cannot be copied: Video CD, Audio CD and so on.

Preparation:

- Insert the finalised disc (→ 17).

After performing steps ①–⑤ (“Format” is automatically set to “DVD-Video”) (→ 53, Copying using the copying list—Advanced Copy)

⑥ Set “Copy Time”.

– If you are not going to change the setting (→ step ⑦).

Setting the unit to copy according to the set time

① Press [▲, ▼] to select “Copy Time”, then press [▶].

② Press [▲, ▼] to select “Time Setting”, then press [OK].

– Setting the unit to copy all the content on the disc

③ Press [▲, ▼] to select “Off”, then press [OK].

④ Press [◀] to confirm.

Copy will continue until there is not enough available recording space on the HDD.

– Setting the copying time

③ Press [▲, ▼] to select “On”, then press [OK].

④ Press [▲, ▼] to select “Copy Time”, then press [OK].

- ⑤ Press [◀, ▶] to select "Hour" and "Min.", then press [▲, ▼] to set the recording time.
 - ⑥ Press [OK].
 - ⑦ Press [◀] to confirm.
Copying to the HDD continues for the set time even after the content being played finishes.
- Set a few minutes longer than the source title, in order to include the operation time before play begins.
 - You can also set the recording time with the numbered buttons.

7 Press [▲, ▼] to select "Start Copying", then press [OK].

Press [◀] to select "Yes", then press [OK] to start copying. The disc top menu is displayed.

- Disc play automatically begins from title 1 when "Title 1" is selected from the "Auto-Play Select" menu when finalising the disc (→ 59).

8 When the top menu is displayed Press [▲, ▼, ◀, ▶] to select the title you want to start copying, and press [OK].

While playing in order, all the titles after the selected title are recorded until the set time. (After the last title on the disc has finished playing the top menu is recorded until the set time is reached.)

Tips

To return to the previous screen

Press [RETURN].

To stop copying

Press [■ STOP].

You can also press and hold [RETURN] for 3 seconds to stop copying.

- If stopped partway, copying will be up to that point.

Notes

- If you perform search, frame-by-frame or pause while copying, that portion of title is not recorded.
- The screen on the right is recorded at the beginning.
- The content is recorded as 1 title from the start of copy to the end.
- If play does not begin automatically or if the top menu does not display automatically, press [▶ PLAY] to start.
- Even if you copy a high quality video/audio DVD, the original picture and audio quality cannot be exactly replicated.
- If you want to copy a title from a finalised DVD-RW (DVD Video Recording format), create a copy list and then copy (→ 53, Copying using the copying list–Advanced Copy).

Finalising

-R -R DL -RW(V) +R +R DL

You can play these discs on compatible DVD players by finalising it on the unit, effectively making it into DVD-Video that complies with DVD-Video standards. The menu you create with the unit can also be used on most DVD players.

Perform preparation steps **1–4** of “Accessing the Management Menus” (→ 58).

- 5 Press **[▲, ▼]** to select “Finalise”, then press **[OK]**.
- 6 Press **[◀]** to select “Yes”, then press **[OK]**.
- 7 Press **[◀]** to select “Start”, then press **[OK]**.
 - Finalising starts and cannot be cancelled (may take up to 15 minutes) (**-R DL +R DL** up to 60 minutes)
 - A message appears when finalising is finished.
- 8 Press **[OK]** to complete.

Notes

- Do not disconnect the AC mains lead while finalising. This can render the disc unusable.
- When finalising a high-speed recording compatible disc, it may take longer than displayed on the confirmation screen (approximately 4 times longer).
- After finalising
 - **-R -R DL +R +R DL** The disc becomes play-only and you can no longer record or edit it.
 - **-RW(V)** You can record and edit the disc after formatting although it becomes play-only after finalising.
 - When copying in high speed, chapters will be replicated.
 - The disc finalised on the unit may not be playable on other players depending on the condition of the recording.
 - There is a pause of several seconds between titles and chapters during playback.
 - **-R -RW(V)** Titles are divided into about 5-minute (**+R** 8 minute) chapters, if*
 - the titles were directly recorded to the disc.
 - the titles were copied using any mode other than the high speed mode (excluding **-R DL +R DL**).* This time varies greatly depending on the condition and mode of recording.

Tips

- After you have finished recording or copying and try to eject the disc, a screen asking if you want to finalise the disc appears (→ 25).

Create Top Menu

+RW

+RW discs contain no Top Menu data. Top Menu is a convenient function. We recommend you create the menu before playing a +RW disc on other equipment.

Perform preparation steps **1–4** of “Accessing the Management Menus” (→ 58).

Edit Profiles

You can create four profiles of channels for making viewing and recording easier. Editing these profiles does not affect the channel setting itself.

- Timer recording may not work correctly if you edit the profiles during timer recording standby.
- Channel numbers cannot be changed, due to broadcast restrictions.

To select the profile

Press the "Green" button.

To add channels to a profile

1 Press [▲, ▼] to select the channel in the "All Services" column, then press the "Yellow" button.

- Repeat this step to add other channels.
- Press the "Blue" button to add all the available channels to the profile. (Only when no channels have been added to the profile.)

2 Press [OK] to save the profile.

To change the order of channels of a profile

- 1 Press [▶]*.
- 2 Press [▲, ▼] to select the channel in the "Profile" column to move, then press the "Green" button.
- 3 Press [▲, ▼] to select the new position of the channel then press the "Green" button.

Auto-Setup Restart

You can restart auto channel setting for digital terrestrial channels if set up (\rightarrow 13) fails for some reason.

However, if you perform "Auto-Setup Restart", all channel settings and all created profiles are deleted.

Press [\leftarrow] to select "Yes", then press [OK].

Tips

- You can also use the following method to restart Auto-Setup. (All the settings except for the ratings level, ratings password, Owner ID and Clock return to the factory preset. The timer recording programmes are also cancelled.)

When the unit is turned on and stopped, press and hold [CH \wedge] and [CH \vee] on the main unit simultaneously for about 5 seconds.

- Auto-Setup screen appears.

DVB Manual Tuning

You can set channels manually if the DVB Auto-Setup could not be completed successfully.

- Press [\blacktriangle , \blacktriangledown] to select the channel you want to set.
 - Select the channel by checking the signal strength and signal quality displays. [Refer to "Signal Condition" (\rightarrow right) for signal strength and signal quality.]
- Press [OK] to start scan.
 - The set channel is displayed in the table.

- Press [EXIT] and press [\wedge \vee CH], then check that applicable channels have been selected.

Add New DVB Services

You can search for newly added digital terrestrial channels to receive.

- The unit starts searching for newly available digital terrestrial channels. This takes about 5 minutes.
- The bar over the table shows you the search progress. At the end of the search, the number of found new digital stations appears.
- "No new services found.", is displayed when no new services can be found.

Press [OK] to save the newly found channels.

Tips

To cancel in middle

Press [RETURN].

The channels found before stopping are not saved.

Signal Condition

You can check the quality and strength of digital broadcast signals.

Realign the aerial if you are receiving a poor signal.

When "Signal Condition" is displayed in grey and cannot be selected:

- Press [EXIT] to exit the screen.
- Press [\wedge \vee CH] to select a digital channel. "D" appears on the unit's display.
- Display the Setup menu again.

The quality and strength of the signal are shown. Press [\wedge \vee CH] to select the channel.

Signal Quality

Below 2 (display red)	The signal quality is so poor that there may be interference in the pictures and sound.
2-5 (display orange)	The signal quality is basically adequate, but brief interference in the pictures and sound is possible in isolated case.
Over 5 (display green)	Optimum picture and sound quality.

Signal Strength

The display for signal strength is grey. "0" means signal strength 0%, "10" means signal strength 100%. If the signal is too strong, the display will change from grey to red.

Reduce the signal amplification at your aerial.

- When the signal is weak:
 - check that the aerial is correctly positioned.
 - adjust the aerial reception with "DVB Manual Tuning" in the Setup menu (\rightarrow left).
 - check that the current digital broadcast channel is correctly broadcasting.

DVD-V Choose the language for audio, subtitles and disc menus. If a language which is not recorded is selected, or if languages are already fixed on the disc, the language set as the default on the disc will be played instead.

[Original] The original language of each disc will be selected.

[Other *****] This is the language code setting. Input a code number with the numbered buttons (→ 75, "Language code list").

[Automatic] If the language selected for "Soundtrack" is not available, subtitles of that language will automatically appear if available on the disc.

Settings for Recording

Press [OK] to show the following settings.

Recording time in EP mode

Select the maximum number of hours for recording in EP mode.

[EP (6Hours)] You can record for 6 hours on an unused 4.7 GB disc.

[EP (8Hours)] You can record for 8 hours on an unused 4.7 GB disc.

Recording Format

Titles recorded to the HDD with "Recording Format" set to "Video format" can be copied to DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R, +R DL and +RW using high speed mode.

We recommend turning the setting "VR format" if high speed copy to DVD-R, etc. is not necessary when recording a programme. This setting is effective when recording from a television programme or external equipment, or when copying from a finalised DVD-Video disc.

[VR format] High speed copy from HDD is possible only to DVD-RAM.

[Video format] You can high-speed copy to DVD-R, etc. Press [◀, ▶] to select "Yes" and press [OK].

- In some cases, copying to DVD-R, etc. using the high speed mode does not work (→ 50, "Important")

DVD Speed for High Speed Copy

Select the speed of high-speed copying (When using high-speed copy compatible DVD-RAM 5X, DVD-R, +R 8X or +RW 4X discs).

[Maximum] Selecting "Normal (Silent)" means the noise generated by this unit is less than "Maximum", however the time required for copying will double (approximately).

- [Field] Select if jittering occurs when "Automatic" is selected.
- [Frame] Select if you cannot see small text or fine patterns clearly when "Automatic" is selected.

Seamless Play

Select the play mode between playlist chapter segments and partially deleted titles.

- [On] The chapters in playlists are played seamlessly. This does not work when there are several audio types included on the playlist and when using Quick View (Play x1.3). Additionally, the positioning of chapter segments may change slightly.
- [Off] The points where chapters in playlists change are played accurately, but the picture may freeze for a moment.

Digital Audio Output

Change the settings when you have connected equipment through the unit's DIGITAL AUDIO OUT terminal (→ 70). Press [OK] to show the following settings.

PCM Down Conversion

- Select how to output audio with a sampling frequency of 96 kHz or 88.2 kHz.
- Signals are converted to 48 kHz or 44.1 kHz despite the above settings if the signals have a sampling frequency of over 96 kHz or 88.2 kHz, or the disc has copy protection.
- [On] Signals are converted to 48 kHz or 44.1 kHz. (Choose when the connected equipment cannot process signals with sampling frequency of 96 kHz or 88.2 kHz.)
 - [Off] Signals are output as 96 kHz or 88.2 kHz. (Choose when the connected equipment can process signals with sampling frequency of 96 kHz or 88.2 kHz.)

Dolby Digital*

Choose whether to output by "Bitstream", which processes Dolby Digital signals on other connected equipment, or to convert the signals to "PCM (2ch)" on the unit before output.

- [Bitstream] When you have connected the unit to a piece of equipment having Dolby Digital logo.
- [PCM] When you have connected the unit to a piece of equipment that doesn't have Dolby Digital logo.

DTS*

Choose whether to output by "Bitstream", which processes DTS signals on other connected equipment or to convert the signals to "PCM (2ch)" on the unit before output.

- [Bitstream] When you have connected the unit to a piece of equipment having DTS logo.
- [PCM] When you have connected the unit to a piece of equipment that doesn't have DTS logo.

MPEG*

- Choose whether to output by "Bitstream", which processes MPEG audio signals on other connected equipment or to convert the signals to "PCM (2ch)" on the unit before output.
- [Bitstream] When you have connected the unit to a piece of equipment with a built-in MPEG decoder.
 - [PCM] When you have connected the unit to a piece of equipment without a built-in MPEG decoder.

Audio Mode for XP Recording

Choose the audio type when recording or copying with XP mode.

- [Dolby Digital] (→ 84)
- [LPCM] (→ 84)
 - The picture quality of LPCM recordings may be lower than that of normal XP mode recordings.
 - The audio recording becomes Dolby Digital even if you selected LPCM when using a recording mode other than XP.

* Incorrect settings can cause noise to be output which can be harmful to your ears and speakers, and audio will not be recorded properly on media such as mini discs.

Progressive

You can enjoy progressive video by connecting this unit's COMPONENT VIDEO OUT terminals to an LCD/plasma television or LCD projector compatible with progressive scan (→ 85).

Before this setting, set "AV1 Output" to "Video (with component)" or "S Video (with component)" (→ 65)

Press [▲, ▼] to select "On", then press [OK].

[On] Output becomes progressive.

[Off]

This setting is fixed with "Off" and there is no output from the COMPONENT VIDEO OUT terminals if you set "AV1 Output" to "RGB 1 (without component)" or "RGB 2 (without component)" (→ 65).

Notes

- When connected to a regular television (CRT: Cathode ray tube) or a multi-system television using PAL mode, even if it is progressive compatible, progressive output can cause some flickering. Turn off "Progressive" if you are concerned about it (→ 57).

- Picture will not be displayed correctly if connected to an incompatible television.

Power Save

[On] [Off]

Refer to the following when “Power Save” is set to “On”.

- Power consumption is minimized when the unit is turned off (→ 86).
- Startup of the unit becomes slower compared to when “Power Save” is “Off”.
- When the unit is off, satellite programmes cannot be watched on the TV because the signal from the satellite receiver connected to AV2 terminal of this unit is not looped through. To watch them, turn on the unit.

System Update

In order to update this unit, the TV Guide download, and support system changes made by broadcasts, this unit periodically performs software updates.

- Press [OK] to show the following settings.
- Update data and EPG download information are sent by an unscheduled digital broadcast. In order to receive these updates, you must be able to receive digital broadcasts.
- An update will take approximately 60 minutes. While the update is in progress, “SW-DL” appears on the unit’s display. You cannot operate the unit until the update is complete. Removing the AC mains lead while the update is in progress may damage the unit.
- An EPG download will take approximately 30 minutes. While the EPG download is in progress, “GUIDE” appears on the unit’s display. The EPG download can be interrupted by switching on the unit.
- To avoid hearing the startup sound of System Update for the unit, perform the following steps.
 - Select the time for Software Update (→ below, TV Guide/ Software search period).
 - Set “TV Guide Download in Standby” and “Software Update in Standby” (→ below) to “Off”, and update manually (→ below, Software Update Search Now).

TV Guide Download in Standby

Additional Connections

Using a fully wired 21-pin Scart cable

- You can use a variety of Q Link functions by connecting the unit to a Q Link compatible television (→ 40).
- You can enjoy high-quality viewing by connecting the unit to an RGB compatible television.
“AV1 Output” in the Setup menu is set to “RGB 1 (without component)” or “RGB 2 (without component)” (→ 65).
Make “AV2 Input” settings in the Setup menu (→ 65).

Use of the RF coaxial cable

- Keep the RF coaxial cables as far away as possible from other cables.
- Do not roll up the RF coaxial cables.

- Before connection, turn off the mains for all connected equipment and read the appropriate operating instructions.
Be sure to read the Caution for AC Mains Lead on page 3.

Adding a VCR: Connecting to a Television and a Video Cassette Recorder

After completing the above connections, proceed to the TV Tuning (→ 13).

To record from a VCR

Refer to “Recording from an External Device” (→ 34).

- You can connect this unit to a TV using the audio/video (AV) cable (included), S-Video cable (not included) or component video cables (not included) instead of the 21-pin Scart cable (→ 10, 11, 68).

Using an Audio/Video Cable (included)

Using an S Video Cable (S Video Cable not included)

The S VIDEO OUT terminal achieves a more vivid picture than the VIDEO OUT terminal. (Actual results depend on the television).

Using Component Video Cables (Component Video Cables not included)

The COMPONENT VIDEO OUT terminals on this unit can be used for either interlace or progressive output (→ 85) to provide a purer picture than the S VIDEO OUT terminal.

- For progressive output (→ 57)

Notes

- If you have a regular television (CRT: cathode ray tube) Progressive output may cause some flickering, even if it is progressive compatible. Turn off "Progressive" if you are concerned about it (→ 57). This is the same for multi system televisions using PAL mode.

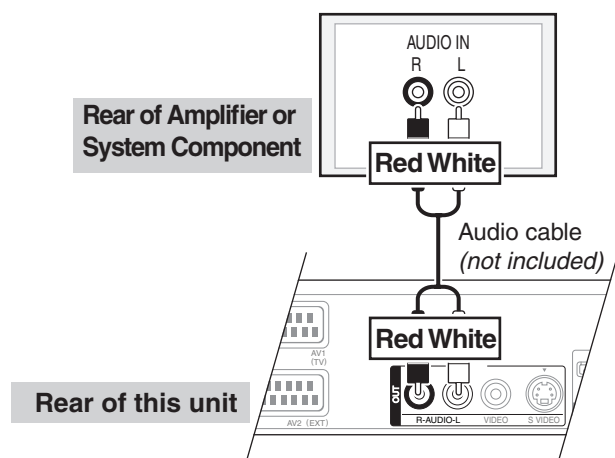

Additional Connections

- You can improve sound quality by connecting this unit to an amplifier or system component using the audio cable or the optical digital audio cable.

Using an Audio Cable for Better Sound

Use this connection to play sound through speakers connected to an amplifier or system component.

Using an Optical Digital Audio Cable for Better Sound (Optical Digital Audio Cable not included)

This method allows you to enjoy multi-channel surround sound on DVD-Video.

- Connect an amplifier or system component with a built-in decoder displaying these logo marks or MPEG decoder.

- Adjust settings in "Digital Audio Output" (→ 63).

Notes

- When this unit is connected to an amplifier with an optical digital audio cable and connected to a television with an HDMI cable, you can enjoy the highest quality of audio from the disc by setting "Digital Audio Output" to "Optical Only" in the Setup menu (→ 65). In this case audio is only output from the amplifier not the television.
- You cannot use DTS Digital Surround decoders not meant for DVD.
- Before purchasing an optical digital audio cable, check the terminal shape of the equipment to be connected.

Connecting with an HDMI (High Definition Multimedia Interface) Terminal

When connected to an HDMI compatible unit, an uncompressed digital audio and video signal is transmitted, enabling you to enjoy high quality, digital video and audio with just one cable. When connecting to an HDMI-compatible HDTV (High Definition Television), the output can be switched to 1080p, 1080i or 720p HD video.

- Please use High Speed HDMI Cables that have the HDMI logo (as shown on the cover).

Regarding VIERA Link "HDAVI Control"™ function

When connecting with a Panasonic TV (VIERA) or a receiver equipped with the "HDAVI Control" function, linked operations would be possible. [→ 40, Linked Operations with the TV (VIERA Link "HDAVI Control"™/Q Link)]

- It is recommended that you use Panasonic's HDMI cable. Recommended part number: RP-CDHG10 (1.0 m), RP-CDHG15 (1.5 m), RP-CDHG20 (2.0 m), RP-CDHG30 (3.0 m), RP-CDHG50 (5.0 m), etc.
- Non-HDMI-compliant cables cannot be utilised.

Using an HDMI (High Definition Multimedia Interface) Cable

- Set "Digital Audio Output" to "HDMI and Optical" (→ 65). (The default setting is "HDMI and Optical".)

Notes

- If connecting to equipment that is only compatible with 2 channel audio output, audio with 3 channels or more will be down-mixed (→ 84) and output as 2 channels, even if connecting with an HDMI cable (some discs cannot be down-mixed).
- For display units compatible with HDCP (High-Band width Digital Content Protection) that are equipped with a digital DVI input terminal (PC monitors, etc.): Depending on the unit, picture may not display properly or at all when connecting with a DVI/HDMI switching cable (audio cannot be output).

Troubleshooting Guide

Before requesting service, make the following checks. If you are in doubt about some of the check points, or if the solutions indicated in the chart do not solve the problem, consult your dealer for instructions.

The following does not indicate a problem with the unit:

- Regular disc rotating sound.
- Poor reception due to atmospheric conditions.
- Image disturbance during search.
- Periodic interruptions to the reception due to satellite broadcasting breaks.
- Operations are slow to respond in power save mode.
- Operations are not working due to a poor-quality disc. (Try again using a Panasonic disc.)
- The unit freezing due to the activation of one of its safety devices (→ 75, To restore the unit if it freezes).
- When the unit is turned on or off, there may be an unexpected sound.

Glossary

Bitstream

This is a signal compressed and converted into digital form. It is converted back to a multi-channel audio signal, e.g., 5.1-channel, by a decoder.

CPRM (Content Protection for Recordable Media)

CPRM is technology used to protect broadcasts that are allowed to be recorded only once. Such broadcasts can be recorded only with CPRM-compatible recorders and discs.

Decoder

A decoder restores the coded audio signals on DVDs to normal. This is called decoding.

Deep Colour

This unit incorporates HDMI™ (V.1.3 with Deep Colour) technology that can reproduce greater colour gradation (4096 steps) when connected to a compatible TV.

You can enjoy exceptionally rich, natural-looking colours, with smooth, detailed gradation and minimal colour banding.

[A lower colour gradation (256 steps), without deep colour, will be reproduced if connected to a TV which does not support deep colour. The unit will automatically set appropriate output to suit the connected TV.]

Dolby Digital

This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2 channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

When recording on this unit Dolby Digital (2 channel) is the default audio.

Down-mixing

This is the process of remixing the multi-channel audio found on some discs into two channels. It is useful when you want to listen to the 5.1-channel audio recorded on DVDs through your TV's speakers. Some discs prohibit down-mixing. If this is the case, this unit can only output the front two channels.

Drive

In the instance of this unit, this refers to the hard disk (HDD) and disc (DVD). These perform the reading and writing of data.

DTS (Digital Theater Systems)

This surround system is used in many movie theaters. There is good separation between the channels, so realistic sound effects are possible.

Dynamic range

Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs. Dynamic range compression means reducing the gap between the loudest and softest sounds. This means you can hear dialogue clearly at low volume.

Film and Video

DVD-Video are recorded using either film or video. The unit can determine which type has been used, then uses the most suitable method of progressive output.

Film: Recorded at 25 frames per second (PAL discs) or 24 frames per second (NTSC discs). (NTSC discs recorded at 30 frames per second as well.)

Generally appropriate for motion picture films.

Video: Recorded at 25 frames/50 fields per second (PAL discs) or 30 frames/60 fields per second (NTSC discs). Generally appropriate for TV drama programmes or animation.

Finalise

A process that makes play of a recorded CD-R, CD-RW, DVD-R, etc. possible on equipment that can play such media. You can finalise DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R, and +R DL on the unit. After finalising, the disc becomes play-only and you can no longer record or edit. However, finalised DVD-RW can be formatted to become recordable.

Folder

This is a place on the disc where groups of data are stored together. In the case of this unit, it refers to the place where still pictures (JPEG) are stored.

Formatting

Formatting is the process of making media such as DVD-RAM recordable on recording equipment.

You can format DVD-RAM, DVD-RW (only as DVD-Video format), +RW, and the HDD or unused +R and +R DL on this unit.

Formatting irrevocably erases all contents.

Frame and Field

Frame refers to the single images that constitute the video you see on your TV. Each frame consists of 2 fields.

Frame

Field

Field

- A frame still shows 2 fields, so there may be some blurring between them, but picture quality is generally better.
- A field still shows less picture information so it may be rougher, but there is no blurring.

HDD (Hard disk drive)

This is a mass data storage device used in computers, etc. A disk with a surface that has been treated with magnetic fluid is spun and a magnetic head is brought in close proximity to facilitate the reading and writing of large amounts of data at high speed.

HDMI (High-Definition Multimedia Interface)

Unlike conventional connections, it transmits uncompressed digital video and audio signals on a single cable. This unit supports high-definition video output [720p (750p), 1080i (1125i) and 1080p (1125p)] from HDMI AV OUT terminal. To enjoy high-definition video a high definition compatible television is required.

JPEG (Joint Photographic Experts Group)

This is a system used for compressing/decoding color still pictures. If you select JPEG as the storage system on digital cameras, etc., the data will be compressed to 1/10-1/100 of its original size. The benefit of JPEG is less deterioration in picture quality considering the degree of compression.

LPCM (Linear PCM)

These are uncompressed digital signals, similar to those found on CDs.

MP3 (MPEG Audio Layer 3)

An audio compression method that compresses audio to approximately 1/10 of its size without any significant loss of audio quality.

Pan & Scan/Letterbox

In general, DVD-Video are produced with the intention that they will be viewed on a widescreen TV (16:9 aspect ratio), so images often don't fit regular TVs (4:3 aspect ratio). 2 styles of picture, "Pan & Scan" and "Letterbox", deal with this problem.

Pan & Scan: The sides are cut off so the picture fills the screen.

Letterbox: Black bands appear at the top and bottom of the picture so the picture itself appears in an aspect ratio of 16:9.

Playback control (PBC)

If a Video CD has playback control, you can select scenes and information with menus on the screen.

(This unit is compatible with version 2.0 and 1.1.)

Progressive/Interlace

The PAL video signal standard has 625 (or 576) interlaced (i) scan lines, whereas progressive scanning, called 625p (or 576p), uses twice the number of scan lines. For the NTSC standard, these are called 525i (or 480i) and 525p (or 480p) respectively.

Using progressive output, you can enjoy the high-resolution video recorded on media such as DVD-Video.

Your television must be compatible to enjoy progressive video.

Panasonic televisions with 625 (576)/50i · 50p, 525 (480)/60i · 60p input terminals are progressive compatible.

Protection

You can prevent accidental erasure by setting writing protection or erasure protection.

RGB

This refers to the three primary colours of light, red (R), green (G), and blue (B) and also the method of producing video that uses them. By dividing the video signal into the three colours for transmission, noise is reduced for even higher quality images.

Sampling frequency

Sampling is the process of converting the heights of sound wave (analogue signal) samples taken at set periods into digits (digital encoding). Sampling frequency is the number of samples taken per second, so larger numbers mean more faithful reproduction of the original sound.

Signal Quality

This is the guide for checking the aerial direction. The numbered values displayed do not indicate the strength of the signal, but the quality of the signal (the signal to noise ratio, or "S/N"). The channels you can receive are affected by weather conditions, seasons, time (day/night), region, length of the cable that is connected to the aerial, etc.

Thumbnail

This refers to a miniature representation of a picture used to display multiple pictures in the form of a matrix.

1080i

In one high-definition image, 1080 (1125) alternating scan lines pass every 1/50th of a second to create an interlace image. Because 1080i (1125i) more than doubles current television broadcasts of 480i (525i), the detail is much clearer and creates a more realistic and rich image.

1080p

In one high-definition image, 1080 (1125) scan lines pass at the same time every 1/50th of a second to create a progressive image. Since progressive video does not alternate scan lines like interlace, there is a minimal amount of screen flicker.

720p

In one high-definition image, 720 (750) scan lines pass at the same time every 1/50th of a second to create a progressive image. Since progressive video does not alternate scan lines like interlace, there is a minimal amount of screen flicker.

Information for Users on Collection and Disposal of Old Equipment and used Batteries

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC. By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items. Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union
If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

[Information on Disposal in other Countries outside the European Union]

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
